

Flier to be handed out to known homeschool families and to be posted on homeschool associations' homepage/website.

IRB # 643-10 FB

Hello,

My name is Heather Giles-Woerner. I am a graduate student in developmental psychology at the University of Nebraska at Omaha. I would like to ask you and your family to participate in a research study about your child's electronic media use and other social interactions. The questionnaires are delivered online through the Qualtrics survey system. All of the information gathered is anonymous. We are asking both parents (mothers and fathers) to fill out questionnaires about the oldest home schooled child in your family between the ages of 9 and 17 years old regarding electronic communication and monitoring of different activities. The oldest child that is chosen by the parents will also complete questionnaires. I am specifically interested in looking at homeschoolers because of the lack of information available on these processes within the home school community.

For more information and to complete the study, please go to the study website at https://unopsychology.qualtrics.com/SE/?SID=SV_cOpxsS0Umayvpcg. This link is just for the parents. The child link is available for you to give to your child after you have decided if the child should participate.

If you have any questions regarding the study, please feel free to e-mail me at hgileswoerner@unomaha.edu.

Thanks in advance for your willingness and time to consider this study.
